

Katrien Devolder is a Senior Research Fellow at the Oxford Uehiro Centre for Practical Ethics and an Official Fellow at Reuben College, University of Oxford, where she leads the Ethics and Values Research Theme. She is also subject editor for the Routledge Encyclopedia of Philosophy. Her work lies in applied ethics. She currently holds a Wellcome Trust Research Fellowship to work on the project 'The Ethics of Genome Editing in Livestock'. She previously held a Marie Curie Fellowship at Oxford to work on moral complicity of medical professionals in others' wrongdoing. Prior to coming to Oxford, she was a Postdoctoral Research Fellow and then Assistant Professor in the Department of Philosophy and Moral Sciences at Ghent University. She has published two monographs – one investigating compromise positions in the embryonic stem cell debate (OUP, 2015) and one investigating the ethics of human cloning (LUP, 2001). She has also published on ethical issues pertaining to the treatment of sex offenders, genetic selection, gamete donation, life extension, compromising in bioethical debate, and euthanasia. She regularly makes YouTube video-interviews with academics for The Practical Ethics Channel, to make ethical debates more widely accessible.
